

- Evaluate  $\iint_D (x^4 - y^4) dA$ , where  $D$  is the part of the first quadrant with
 
$$1 \leq x^2 - y^2 \leq 3, \quad 2 \leq xy \leq 3.$$
- Find the coordinates of the centroid of the region inside the sphere  $x^2 + y^2 + z^2 = a^2$ , outside the cone  $x^2 + y^2 = b^2 z^2$ , and above the  $xy$ -plane.
- Let  $C$  be the curve that goes from  $(-1, 0)$  to  $(0, 1)$  along the graph of  $y = 1 - x^2$ , and then from  $(0, 1)$  to  $(1, 0)$  along the graph of  $y = 1 - x$ . Compute  $\int_C y dx - x dy$ .
- Find the area of that part of the surface  $z = 2x^2 + 3xy - 2y^2$  that is inside the cylinder  $25x^2 + 25y^2 = 3$ .
- If  $\vec{F} = \frac{2x\vec{i} + 2y\vec{j} + 2z\vec{k}}{(x^2 + y^2 + z^2)^{3/2}}$ , compute  $\text{div } \vec{F}((x, y, z) \neq (0, 0, 0))$ .
  - If  $\vec{F}$  is as in part (a), and  $S$  is the spherical surface  $x^2 + y^2 + z^2 = a^2$  with normal directed outward, compute  $\iint_S \vec{F} \cdot \hat{N} dS$ .
  - If  $\vec{F}$  is as in part (a), and  $S$  is the surface of the cube  $-1 \leq x \leq 1$ ,  $-1 \leq y \leq 1$ ,  $1 \leq z \leq 3$  with normal directed outward, compute  $\iint_S \vec{F} \cdot \hat{N} dS$ .
- Let  $\vec{F} = y^3\vec{i} - 2z^3\vec{j} + x^3\vec{k}$ .  
If  $C$  is the curve of intersection of  $x^2 + y^2 + z^2 = 1$  and  $z = x$ , directed counterclockwise when viewed from above, compute  $\int_C \vec{F} \cdot d\vec{r}$  using Stokes's theorem.
- The equations

$$xyuv = -2$$

$$x^2 + 2y^2 + 3u^2 + 4v^2 - uv = 17$$

define  $u, v$  as functions of  $x, y$  in the neighbourhood of the point  $x = 1, y = -1, u = 2, v = 1$ . Find  $\frac{\partial u}{\partial x}, \frac{\partial u}{\partial y}, \frac{\partial v}{\partial x}, \frac{\partial v}{\partial y}$  in the neighbourhood of that point.

- Use the method of Lagrange multipliers to find the maximum value of  $z$  on the intersection of  $x^2 + 2y^2 + 3z^2 = 1$  and  $x + y + z = 0$ .

FACULTY OF ENGINEERING

FINAL EXAMINATION

MATHEMATICS 189-265B

ADVANCED CALCULUS

Examiner: Professor D. Sussman  
Associate Examiner: Professor J.J. Xu

Date: Friday, April 18, 1997  
Time: 9:00 A.M. - 12:00 Noon

INSTRUCTIONS

**Calculators Not Permitted**

This exam comprises the cover and 1 page of questions.
